EDUCATION

University of Florida

Bachelor of Science in Computer Science | GPA: 3.75/4.0

Gainesville, FL

Aug. 2023 – May 2027

PROJECTS

Stacked | React, TypeScript, Supabase, PostgreSQL, Vercel, Capacitor

May 2026 – Present

- Grew a poker bankroll management application to 50+ active users by building and publishing a full-stack iOS app that tracks sessions, performance analytics, and results with friends.
- Enabled real-time social and financial tracking across 5+ core workflows by designing PostgreSQL schemas and Supabase backend logic for sessions, groups, leaderboards, authentication, and home-game payouts.
- Shipped Stacked from initial development to the Apple App Store by building the frontend with React and TypeScript, integrating Capacitor for iOS, and continuously releasing production updates based on user feedback.

Offerly | React, TypeScript, Supabase, PostgreSQL, AWS Lambda, Google OAuth

Jun. 2026 – July 2026

- Centralized 6+ stages of the job-search lifecycle into a single platform by developing dashboards for applications, interviews, offers, rejections, ghosted applications, and follow-ups.
- Reduced manual application tracking by integrating Google OAuth and Gmail synchronization to identify recruiting emails and automatically capture application activity.
- Supported 4+ interconnected recruiting data domains by designing PostgreSQL schemas and Supabase backend workflows for applications, networking contacts, user profiles, and email synchronization.

GatorKeys | React, Python, Firebase, HTML/CSS, Vercel

Aug. 2025 – Dec. 2025

- Architected and deployed a full-stack housing marketplace supporting 100+ apartment listings, enabling students to search properties, communicate with landlords, and securely manage accounts within a single platform.
- Enabled real-time synchronization across 3 core platform features by designing scalable Firebase data models for property listings, user messaging, and reviews.
- Streamlined apartment discovery across desktop and mobile devices by building responsive React interfaces with dynamic property search and filtering.

EXPERIENCE

Sports Program Supervisor

August 2025 - Present

UF RecSports

Gainesville, FL

- Supervised and evaluated 100+ intramural referees, improving officiating consistency and game-day operations through real-time performance feedback, conflict resolution, and on-field leadership.
- Trained and mentored officials in soccer rules, mechanics, and positioning through hands-on instruction while supporting participant safety through check-ins, first-aid response, and injury management.
- Coordinated officials across simultaneous intramural games, resolving real-time staffing, rule, and participant issues to maintain safe and on-time game operations.

Transportation Intern

May 2024 - August 2024

School District of Palm Beach County

Palm Beach, FL

- Developed SQL queries supporting backend operations for the district's transportation management system, improving access to operational data used by internal staff.
- Deployed and configured 100+ employee workstations, minimizing downtime during hardware upgrades and improving operational readiness across the department.
- Processed and issued 1,000+ secure employee identification cards using enterprise systems, supporting credentialing and access operations for transportation personnel.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS

Technologies: React, Node.js, Supabase, PostgreSQL, Firebase, Flask, REST APIs, Pandas, NumPy, Capacitor

Developer Tools: Git, GitHub, Docker, AWS, Vercel, Xcode

Concepts: Full-Stack Development, Database Design, Authentication, API Development, Object-Oriented Programming, Data Structures & Algorithms
