EDUCATION

University of Florida

Bachelor of Science in Computer Science

Gainesville, FL

Aug. 2023 – May 2027

EXPERIENCE

Transportation Intern

School District of Palm Beach County

May 2024 - August 2024

Palm Beach, FL

- Developed and executed SQL queries to support backend functionality for a transportation intranet system
- Processed and issued 1,000+ secure identification cards for school staff using enterprise systems
- Installed over 100 new desktops and monitors to employees within the transportation department

Information Technology Intern

School District of Palm Beach County

May 2022 - July 2022

Palm Beach, FL

- Diagnosed, repaired, and re-imaged 10,000+ student and staff devices, improving system reliability
- Configured and deployed hardware/software environments for large-scale educational use
- Assisted in IT service operations, including ticket resolution and vendor coordination

PROJECTS

GatorKeys | *Python, HTML, React, Firebase, Vercel*

August 2025 – December 2025

- Architected and deployed a full-stack web application supporting 10,000+ records for apartment listings, messaging, and user reviews
- Designed and optimized a Firebase database schema with real-time synchronization for user interactions and data updates
- Engineered responsive front-end components using React, HTML, and CSS for listing creation, search, and user engagement
- Deployed scalable frontend and backend infrastructure using Vercel and Render, enabling continuous integration and delivery

PicklePortal | *React.js, TypeScript, ESP32 Microcontrollers, Git, IoT*

August 2025 - December 2025

- Built a real-time IoT monitoring system integrating ESP32 hardware with a React dashboard for live occupancy and queue tracking
- Developed and maintained a Firebase Realtime Database to synchronize data between embedded devices and web clients
- Engineered dynamic frontend components using React and TypeScript for data visualization and system status tracking
- Integrated device-to-cloud communication pipelines, ensuring reliable data transmission from sensors to backend services

Soccer Analysis | *Python, Pandas, YOLOv5*

May 2024 - June 2024

- Developed a computer vision pipeline using Python and YOLOv5 to detect players, referees, and ball movement in match footage
- Trained a custom object detection model on a Kaggle dataset, achieving 97.7% detection accuracy
- Implemented tracking logic to analyze team possession metrics and movement patterns

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, C

Frameworks: React, Flask, Firebase, REST APIs, Node.js, Pandas, NumPy

Developer Tools: Git/GitHub, Docker, AWS, Vercel, Render, VS Code, IntelliJ, PyCharm

Concepts: Full-Stack Development, Object-Oriented Programming, Data Structures & Algorithms, Database Design, IoT Systems, Computer Vision
